SynergyFieldbook

synergy

TOTAL SYNERGY

SynergyFieldbook is designed specifically for Synergy's surveying customers.

This add-on for Synergy ensures any project data collected in the field syncs back to the relevant project folder in Synergy. Your team leader can record project data on your team's behalf, reducing administration time and cost in the field and back in the office.

- Designed specifically for use on small devices — anywhere you are

- Syncs with your Synergy project management platform with all the information and access you need for the job at hand

- Log consumables and expenses while on the move in the field

- Keep accurate audit trails on the go with photos of receipts to attach to your cash expenses

- Log timesheets for the whole team through one team leader account and save hours of admin time and frustration

- Keep accurate and up to date records using timers for each job (which are automatically applied to your timesheets on the Synergy platform so you can avoid double-entry)

Thank you for choosing Synergy software to better your business and projects.

We truly value our customers.

Getting started

- Purchase licenses for SynergyFieldbook for you and your team from the main organization menu in the Synergy app. Download the SynergyFieldbook add-on from the **Apple Store** or **Google Play Store**, and use your Synergy credentials to log in.

- For more information on SynergyFieldbook, get in touch with us to book a free demo, reach out to your account manager, or watch our 3-minute introductory video by scanning the QR code below or clicking **here.**

> "We wanted something really simple, so everyone in the field could use it really easily and really quickly. Total Synergy gave it to us with SynergyFieldbook — and it is really great!"

Abbey Scott, Project Coordinator, Alexander Symonds
