

SynergyHR

SynergyHR: HR management made easy for Architects and Engineers

A simple way to manage your staff and resourcing, fully integrated with your Synergy timesheet and project management workflows.

- **Track staff availability and resource projects easier than ever before**

Have greater oversight over available and unavailable periods with team leave calendars. See leave requests against projects to understand how they may impact resourcing and delivery.

- **Automate leave policies with direct timesheet integration**

Save time by creating leave policies that automatically apply public holidays and time-off to your staff timesheets. Update and approve leave with an easy-to-manage workflow.

- **Record staff qualifications and skills**

Easily manage staff credentials such as site inductions, certifications and licenses. Track additional skills such as areas of expertise so you can put the right people on the right project, every time.

- **Keep staff records safe and secure**

Store private staff information and documentation securely, such as drivers licence number, emergency contact details, and medical certificates. Keep private notes such as work anniversaries and set todos and reminders for events like performance reviews.

- **Generate custom reports to review staff information**

Easily compare and review staff availability, credentials, and more so you can better manage your staff time and project resourcing.

Thank you for choosing Synergy software to better your business and projects.

We truly value our customers.

Price

Check the in-app subscription page to see the price calculation for your company size and region.
